Welcome to the first public meeting for the Burleson Transit Oriented Development Study! Your participation is critical to help ensure project outcomes reflect the character of Burleson, and serve area residents in the best manner possible.

**Presentation**
Tonight’s meeting will begin with a presentation at 6:30 p.m. The presentation will include background information, explain the project process and timeline, and set the stage for helping you provide us with input.

**Open House**
At 7:10 p.m., the meeting will convert into an open house and offer you the opportunity to visit each of three stations set up in the room. The stations each have a focus as follows:

- **Focus Area 1 – Transportation**
  At this station you will be asked to provide information about how you currently use transportation and how you might change your transportation pattern in the future.

- **Focus Area 2 – Development/Market**
  This station will display information about building types and population densities. You will have the chance to offer your thoughts about Burleson’s growth and how it can best serve the community and help make transit more effective.

- **Focus Area 3 – Station Design Elements**
  Different station designs from other places, and the styles and elements that are considered when a train station is designed will be offered at this station. You will be asked to comment on which design elements you think would best fit the character of Burleson.

**Comments**
Please feel free to give your comments on any of the information presented here tonight to any project staff. Also, please take a few minutes to answer some questions on the Public Meeting Comment form and give us your feedback. You can leave it with us tonight or take it home and return it by mail or fax.

Thank you for coming. We appreciate your participation.
